

# Ændring af Digitaloverflytning domæne

**19-10-2023: Tilføjet afsnit vedr. skift af signeringscertifikater.**

De nuværende digitaloverflytning domæner skal ændres.

Herunder er et overblik over hvilke ændringer der skal foretages:

MILJØ	GAMMEL URL	NY URL
TEST	<a href="https://faciliatestservice.dk/facilia.server/digitaloverflytningx509.svc">https://faciliatestservice.dk/facilia.server/digitaloverflytningx509.svc</a>	<a href="https://test.digitaloverflytning.dk/digitaloverflytningx509.svc">https://test.digitaloverflytning.dk/digitaloverflytningx509.svc</a>
PRODUKTION	<a href="https://faciliaservice.dk/facilia.server/digitaloverflytningx509.svc">https://faciliaservice.dk/facilia.server/digitaloverflytningx509.svc</a>	<a href="https://digitaloverflytning.dk/digitaloverflytningx509.svc">https://digitaloverflytning.dk/digitaloverflytningx509.svc</a>

De nye url'er kan allerede nu benyttes både i test og i produktion. De eksisterende klientcertifikater kan naturligvis stadig benyttes på de nye url'er. De gamle url'er vil fungere en i en overgangsperiode indtil alle a-kasser har fået skiftet.

I forbindelse med skift til OCES3 certifikater i den nærmeste fremtid vil a-kasserne alligevel skulle ændre i konfigurationen mod Digitaloverflytning og vi foreslår at udføre ovenstående ændring i samme ombæring.

## Skift til OCES3 signing certifikater på nye domæner

Den **1. april 2024 kl. 12** vil DigitalOverflytning's signeringscertifikat i **produktion** på domænet digitaloverflytning.dk blive udskiftet til OCES3 certifikat: **KMD A/S – Foeniks-DO / CVR:26911745**

Den **1. november 2023 kl. 12** vil DigitalOverflytning's signeringscertifikat i **test** på domænet test.digitaloverflytning.dk blive udskiftet til OCES3 certifikat: **Foeniks-DO-TEST CVR:2691174**

Den offentlige del af certifikaterne installeres ved kopiere base64 teksten i de næste afsnit ind i en tekstfil og herefter omdøbe det til .cer.

**OBS:** Det er muligvis også nødvendigt at installere intermediate- (Den Danske Stat OCES udstedende-CA 1) og rod-certifikatet (Den Danske Stat OCES rod-CA), så certifikatkæden kan valideres i det kaldende system.

### Hvis jeres integration benytter:

- Microsoft AD FS eller Facilia klienten med binding "Fast" eller "Standard", så skal KMDs nye OCES3 certifikat konfigureres som "Encryption Certificate" på Relying Party i jeres AD FS server på ca. samme tidspunkt som vi skifter hos KMD/Facilia.
- X509 klient/server certifikater til Digital Overflytning, så har I sandsynligvis brug for at konfigurere KMDs nye OCES3 certifikat som server certifikat i jeres systemer. Hvordan og hvornår kommer an på platform/arkitektur for jeres klientapplikation(er).
- Hvis I kun benytter KMD Føniks, skal I ikke foretage jer noget.

## KMD A/S - Foeniks-DO-TEST CVR: 26911745
